

Lace Stenciling Fabric Spray Shirt

Give a simple top an ultra femme makeover with lace fabric and Tulip® ColorShot Instant Fabric Color! Shimmery gold is the perfect shade to take your look from summer into fall without skipping a beat.

1. Wash and dry shirt according to laundering instructions. Do not use fabric softener.
2. Cover work area with a disposable plastic tablecloth. (Make sure to work in a well-ventilated space.) Lay shirt flat on work surface and place a piece of freezer paper or wax paper inside shirt to prevent paint seepage to the backside.
3. Cover any sections of shirt you wish to prevent from being painted with paper towels and tape in place.
4. Lay lace fabric over shirt where desired. Shake can of ColorShot spray and spray a light coat of color over the top of the lace fabric. Wait several minutes and spray another light coat.
5. Remove lace and let color dry.
6. Flip shirt over and repeat on backside. Let dry completely and launder according to package instructions.
